

Vacuum Pump Oil

Product Features

- Highly refined base oils with advanced production sludge, carbon and produce very low maintenance vacuum for a long time.
- The vapor pressure is very low and narrow boiling range is high vacuum.
- Thermal stability, oxidation stability, exhibit in gaseous and
- Hangyu Mars excellent water separation and moisture condensation inside the machine, or even suppress the contamination from the outside because the emulsion can be used for a long time.
- Good lubricity and wear hardly occurs.
- Increase the viscosity index of seasonal changes in the classification of viscosity grade is unnecessary and even Bootability the machine is good in winter, and always maintain the proper viscosity during operation.

Product Applications

- Vacuum distillation unit, a vacuum concentration apparatus, vacuum drying apparatus, a vacuum packaging apparatus, vacuum impregnation apparatus, a vacuum forming device,
- Vacuum degasser, a vacuum cooling apparatus, a vacuum filtering apparatus, a vacuum reduction device, a vacuum vapor deposition apparatus,
- vacuum casting equipment, vacuum melting equipment, vacuum sublimation equipment, Vacuum sterilizers, vacuum refining unit,

Vacuum pump oil

Separation	Viscosity cSt 40°C	Flash Point °C	Pour Point °C	Steam pressure Torr (25°C)	Others
EM 150	15	≥200	-17.5	5 × 10 ⁻⁴	Mineral
EM 350	46	≥210	-15		Mineral
EM 300	68	≥210	-15		Mineral
